You are cordially invited to the 2023 IEEE International Symposium on Antennas and Propagation and USNC-URSI Radio Science Meeting – AP-S/URSI 2023, from July 23–28, 2023, at the Oregon Convention Center and Hyatt Regency, in Portland, Oregon, USA, the City of Roses. This conference is cosponsored by the IEEE Antennas and Propagation Society (AP-S) and the US National Committee (USNC) for the International Union of Radio Science (URSI). It is intended to provide an international forum for the exchange of information on state-of-the-art research on antennas, propagation, electromagnetic engineering, and radio science. The symposium and meeting will include a wide range of technical sessions, invited talks, special sessions, student paper and design competitions, short courses, tutorials, exhibits, professional meetings, tours, and networking events.

Paper Submission

Authors are invited to submit abstracts and papers for review and possible presentation on topics of interest to AP-S and USNC-URSI:

- **AP-S submissions** must be in standard IEEE two-column format and must be two pages in length.
- **USNC-URSI submissions** may be in either a one-page, one-column format with a minimum length of 250 words, or in the IEEE two-page, two-column format with a length of two pages.

Suggested topics and general information are listed on the conference website. Please note the following:

- In all cases, only accepted and presented submissions that are in the IEEE two-page two-column format and substantially fill the two pages will be submitted for possible inclusion in IEEE Xplore if the author chooses submission to Xplore.
- All accepted and presented submissions will appear in the proceedings distributed at the conference.
- The presenting author will be required to register for the conference by the due date (to be announced) in order for their paper to be included in the conference.
- Detailed instructions, including formats and templates, are available on the conference website.
- Every effort will be made to complete the review process by March 15, so attendees have sufficient time to obtain visas as needed.

---

**AP-S Student Paper Competition**

Eligible entries in the Student Paper Competition must have only one student author, and that student must be the first author. Each additional coauthor must submit a signed letter indicating that his/her contribution is primarily advisory, to be uploaded at the time of paper submission. All Student Paper Competition entries will be evaluated using a double-blind review process, in addition to the normal review process used for all submissions to the conference. Detailed instructions are available on the conference website. For additional information, contact Magda El-Shenawee (magda@uark.edu) and Ahmed Hassan (hassanam@umkc.edu)

---

**AP-S Student Design Contest**

All students are encouraged to form teams and participate in the Student Design Contest. Each team should consist of two to five students, with at least 50% being undergraduate students. Detailed instructions may be found on the conference website. For additional information, contact Ting-Yen Shih (tshih@uidaho.edu) and Glauco Fontgalland (fontgalland@dee.ufcg.edu.br).

---

**Short Courses/Workshops/Tutorials**

Several short courses, workshops, and tutorials on topics of special and current interest will be solicited by the technical program committee and organized for the conference. In addition, colleagues who wish to organize a short course, workshop, or tutorial should contact Ata Zadehgol (azadehgol@uidaho.edu) and George Trichopoulos (gtrichop@asu.edu) by December 1, 2022.

---

**Exhibits**

Industrial, academic, government, software, and book exhibits will be open during the majority of the conference days. Exhibitor registration and additional information may be found on the conference website. Interested parties may contact Fikadu Dagefu (fikadu.t.dagefu.civ@army.mil) as well as Luis Gomez (ljgomez@purdue.edu).

---

**Special Sessions**

Requests to organize special sessions for the conference should be submitted to Dan Sievenpiper (dsievenpiper@eng.ucsd.edu) and Koichi ITO (k-ito@ieee.org) no later than October 15, 2022. Each proposal should include the title of the special session, a brief description of the topic, an indication of whether the proposed session is for AP-S, USNC-URSI, or joint, and justification for its designation as a special session. Details of submission are posted on the conference website. Special sessions will be selected and finalized by Nov. 15, 2022. At that time, additional instructions will be provided to the organizers of the special sessions chosen for inclusion in the conference. The associated papers or abstracts will be due January 27, 2023.

---

**Social Program**

The social program for the AP-S/URSI 2023 Portland Conference includes a Welcome Reception, Students’ and Young Professionals’ Reception, Diversity and Inclusion Events, and an Awards Presentation and Social Event. There will also be private tours available, as well as a rich Accompanying Persons/Families Program. We will help attendees obtain Childcare Services as needed.

---

**Sponsorships**

We have many outstanding opportunities for sponsorships of the conference and its various aspects. Interested parties should contact Fikadu Dagefu (fikadu.t.dagefu.civ@army.mil) and Luis Gomez (ljgomez@purdue.edu).

The conference will be held at the Oregon Convention Center and the Hyatt Regency Portland Hotel, both of which are located across a quiet street from one another. These sites are located in downtown Portland, which is nine miles from the Portland International Airport. The MAX mass transit public light rail system stops 446 times a day at the Convention Center. For just $2.50 USD, attendees may ride the light rail from the airport to the Convention Center. Before or after the conference, attendees may want to consider visiting nearby points of interest, such as the Columbia River Gorge and Multnomah Falls (35 minutes away from the Convention Center), Washington Park (12 minutes away and includes the Hoyt Arboretum, Portland Japanese Garden, and Oregon Zoo), Oregon Museum of Science and Industry (6 minutes away), Powell’s City of Books (5 minutes away), Mt. St. Helens National Volcanic Monument (1 hour 15 minutes away), Cannon Beach (1.5 hours away), various wineries (5 minutes – 1 hour away), etc. Note that Oregon does not have any sales tax.

AP-S Topics

Antennas
1. Antenna theory
2. Antenna feeds and matching circuits
3. Mutual coupling in antenna arrays
4. Dielectric resonator antennas
5. Microstrip antennas, arrays, and circuits
6. Slotted and guided wave antennas
7. Phased-array antennas
8. Reflector and reflectarray antennas
9. Electrically small antennas
10. Broadband/ultra-wideband antennas
11. Multi-band antennas
12. Adaptive, active, and smart antennas
13. Reconfigurable antennas and arrays

Computational & Numerical Techniques
21. Computational electromagnetics
22. High-frequency and asymptotic methods
23. Integral-equation methods
24. FDTD methods
25. FEM methods
26. Hybrid methods
27. Techniques for transient simulations
28. Optimization methods in EM designs
29. Parallel and special-processor-based numerical methods

Electromagnetics & Materials
14. Electromagnetic theory
15. Electromagnetic material properties and measurements
16. Frequency-selective surfaces
17. Electromagnetic bandgap materials
18. Metamaterials and metasurfaces
19. Nano-electromagnetics
20. Electromagnetic education

Propagation & Scattering
30. Indoor, urban, terrestrial, and ionospheric propagation
31. Propagation and scattering in random or complex media

Antenna Applications & Emerging Technologies
35. Biomedical applications
36. MIMO implementations and applications
37. Mobile and PCS antennas
38. RFID antennas and systems
39. Ultra-wideband systems
40. Vehicular antennas and electromagnetics
41. Software-defined/cognitive radio
42. On-chip antennas
43. Wireless power transmission and harvesting
44. 3D printed antennas and structures
45. Millimeter-wave and sub-mm-wave antennas
46. Terahertz, infrared, and optical antennas

Devices, Systems, Applications

B.15. RF and microwave devices, structures, and systems
B.16. THz and optical antennas, devices, and systems
B.17. Biomedical applications of fields and waves

Commission C: Radio Communication and Signal Processing Systems
USNC CHAIR: Greg Huff
ghuff@psu.edu

Antennas

C.1. Cognitive radio, software-defined wireless systems, and waveform diversity
C.2. Computational imaging and inverse methods
C.3. Information theory, coding, modulation, and detection
C.4. MIMO and MISO systems
C.5. Radar systems, target detection, localization, and tracking
C.6. Radio communication systems
C.6.1. Internet of Things
C.6.2. 5G
C.6.3. Electromagnetic spectral harmony
C.7. Sensor networks, and sensor array processing and calibration
C.8. Signal and image processing
C.9. Spectrum and medium utilization
C.9.1. Electromagnetic modeling of systems and environments
C.10. Synthetic aperture and space-time processing
C.11. Ground-penetrating radar (GPR)
C.12. Distributed, multi-modality, electromagnetic, autonomous systems

Commission D: Electronics and Photonics
USNC CHAIR: Jonathan Chisum
